Bacdown®

Bacdown Antimicrobial Handsoap won't dry out your hands - even when you scrub 30, 40, 50 times a day! Triclosan, a broad spectrum antimicrobial agent, helps to reduce skin-borne microorganisms for a cleaner, safer work environment. Bacdown is the first antimicrobial soap you will actually enjoy using.

Proguard®

Proguard Professional Handcream combines soothing skin emollients with a barrier film that seals in the moisture, seals out the problems. It is particularly effective in improving latex glove comfort, so if gloves irritate your hands, you need Proguard. Non-greasy, non-perfumed, absorbs rapidly for instant protection and will not breakdown latex gloves.

Proguard® Plus

Proguard Plus uses the same popular formula as our regular Proguard, but with the addition of a safe antimicrobial agent.

Bacdown® Wipes

Bacdown Antimicrobial Skin Wipes are for skin cleansing and sanitizing when soap and water are not immediately available.

Combining alcohol, an antimicrobial agent, and skin moisturizers, Bacdown Wipes satisfy your requirements for skin cleansing "on the move" – carry a few in your pocket wherever you go!

Bacdown® Gel

A smooth antiseptic alcohol gel in a convenient squeeze or pump bottle, BacdownGel is always ready to instantly cleanse and sanitize your hands when you're away from the sink. Convenient and effective, BacdownGel is an essential part of your personal protection program.

Bacdown® Foam

Bacdown Foam is a gentle foamed-alcohol skin sanitizer ideal for hand decontamination when soap and water are not readily available. Emollient-enriched formula will not dry skin or cause the kind of irritation typically linked to alcohol-based products. Meets OSHA's handwashing guidelines. The 11 oz. size is designed for wall mounting for single-hand dispensing.

NoCount® Aerosol

NoCount Aerosol Spray Foam lifts and traps radioactive contaminants on hands and skin so they can be easily rinsed away. Non-irritating and effective, NoCount is ideal when accidental contamination occurs.
