

Molecular Biology Water

Technical Data Sheet

- BRIEF DESCRIPTION -

Molecular Biology water is an ultrapure water intended for use in molecular biology procedures that has been purified via deionization, reverse osmosis, UV, and ultrafiltration. Non-DEPC treated water is nuclease free and has been tested for RNase, DNase, and Protease. For use in procedures electrophoresis, such PCR. sequencing, enzymatic analysis and buffer preparation. Ready-to-use, requires no preparation.

- PRECAUTIONARY STATEMENT -

None

- PACKAGING -

1 Liter 6 / case

- CATALOG NUMBER -

Item FoxWest Sales Cat. No.

6 x 32oz. 1032
